

Midwest Bio-Systems

Compost Value Sampling and Submission Instructions

Forms and Instructions Available at www.midwestbiosystems.com

1. First **remove any debris** or large pieces from the sampling area that would distort the representation of the windrow.
2. Avoid taking samples when compost is **saturated** or when compost has **not been aerated** for a while. It is best, if possible, to **pull samples immediately following turning**.
3. Each compost sample should consist of **6-12 random sub-samples** taken down one side of the windrow and up the other side, gathering 4 quarts of material.
4. Take samples using a **clean** device. Place all sub-samples in a clean (no previous contamination) plastic bucket.
5. **Mix** all combined sub-samples well in the bucket.

6. FOR:

All Tests on **Compost Lab Test** \$100.00

Send 1 quart of material to Midwest Laboratories in a labeled soil bag with the **MBS Compost Lab Test Submission Form**, including an authorization number obtained from MBS. Call 815-438-7200 to get an Authorization number for each sample that you will send to the lab. **Please fax the filled out submission form to (815)-438-7028 before you send a copy with the sample.** Ship the "Soil Sample Bag" AND "MBS Compost Lab Test Submission Form" to:

Attn: Robert Ferris
Midwest Laboratories
13611 B Street
Omaha, NE 68144

NOTE: Sampling Instructions and Submission Forms can be obtained by:

- Calling Midwest Bio-Systems at 1-800-689-0714 and we will fax or mail them to you.
- Email your request to Info@MidwestBioSystems.com for delivery by fax, mail, or PDF files of the forms and instructions by return email (Adobe Acrobat Reader is required to open and print the PDF files).
- Visit www.midwestbiosystems.com, download instructions and forms as PDF files.

Note: Windrows need to be turned within 1-2 weeks of taking a sample. Caution: But when turning the windrow after it has not been turned for a month or longer, you need to be careful and check the very bottom of the windrow to see if the bottom is soggy, anaerobic, or somehow undesirable to turn into the rest of the windrow. It may be necessary to turn the windrow just high enough off the ground to avoid the undesirable layer underneath.

Compost Value Test Descriptions

Forms and Instructions Available at www.midwestbiosystems.com

ACS Compost Lab Test – (Chemical Mineral Profile) = \$100.00 (Results - If a preliminary report is needed, its in 5 days, final report in 15 business days (if requested) & guaranteed at 17 days.)

Includes: % Nitrogen, Nitrite N, Nitrate N, Ammonia N, C:N Ratio, % Moisture, Humus, Sulfate Sulfur, Sulfides, Sodium, pH, Conductivity (Ergs), Redox Potential, Organic Matter

Phytotoxicity Response: 7-Day Seed Germination and 14-Day Vigor

Additional Analysis Options (when added to a package above):

- Building Block Analysis (% dry basis - Phosphorus, Potassium, Calcium, Magnesium) **\$ 45**
- EPA Heavy Metal Analysis (ppm) **\$150**
(Arsenic, Cadmium, Chromium, Copper, Lead, Mercury, Nickel, Selenium, Zinc)
- Trace Element Analysis (ppm) **\$60**
(Zinc, Manganese, Iron, Copper, Boron)
- Weed Seed Germination (30 days required) **\$30**
- E. Coli **\$35**
- Salmonella **\$150**
- Fecal Coliform **\$40**

Feedstock Analysis

Maximize your options in recipe building and process control

Send 1 quart of material to Midwest Laboratories in a labeled soil bag with the **MBS Feedstock Submission Form**, including an authorization number obtained from MBS. Call 815-438-7200 to get an Authorization number for each sample that you will send to the lab. **Please fax the filled out submission form to (815)-438-7028 before you send a copy with the sample.** Ship "Feedstock Sample Container" **AND** "MBS Feedstock Submission Form" to:

Attn: Robert Ferris
Midwest Laboratories
13611 B Street
Omaha, NE 68144

Feedstock Quality = \$85.00

(% Moisture, % Nitrogen, C:N Ratio, Density, Structure Rating for Porosity, Sodium, pH, Conductivity, Redox Potential)

Compost Test Results

	Desirable Level	Your Results	Your Points	Total Potential Points		Value Chart
Nitrogen Cycle						
% N (Dry Basis)	0.6 - 1.2	1.5%	25	45	Nitrogens	
NH ₃ - Ammonia	< 50	51 ppm				
NO ₂ - Nitrite Nitrogen	0	0 ppm				
NO ₃ - Nitrate Nitrogen	600 - 900	578 ppm				
pH	7.3 - 8.1	8.2su	4	7	pH	
Salts						
Sodium	125 - 200	312 ppm	10	14	Salts	
Conductivity	2000 - 3500	1,750 Ergs				
Sulfur						
Sulfate	100 - 500	36 ppm	7	14	Sulfurs	
Sulfide	0	0 level				
Germination						
7 Day Germination %	> 80	100.0 %	14	14	Germination	
14 Day Vigor %	> 70	95.0 %				
Humic Ions						
	50 - 80	240.0	-2	7	Humic Ions	
Redox Potential						
Oxygen Potential	26.5 - 29	30.5				
Moisture %						
Moisture %	40 - 50	47.9 %				
Organic Carbon						
Organic Carbon		18.4 %				
C:N Ratio	15 - 20	20.4:1	4	7	C:N Ratio	
Pathogens						
E. Coli	neg (=< 3 MPN/g)	neg	7	7	Pathogens	
Salmonella	neg (=< 0.5MPN/g)	neg				
Microbe Profile & Diversity Analysis						
Aerobic Count	100M - 10B	540 M	40	45	Microbes	
Anaerobic Bacteria	10:1 to 39:1	15,000 K				
Yeasts and Molds	1K - 100K	35 K				
Actinomycetes	1M - 100M	4 M				
Pseudomonads	1K - 1M	15,000 K				
N-Fixing Bacteria	1K - 1M	740 K				
Aerobic:Anaerobic Ratio	10:1	36 :1				
Diversity	>6.5	5.4				
Maturity Index	>50	77				
Stability	<20	7				
* NT indicates "Not Tested"			Total Score:	109	160	

Notes:

Every effort is taken to provide an accurate analysis of your sample. For reasonable cause a sample can be retested, but due to factors beyond our control in sampling procedures, our liability is limited to the price of the tests.
