Should you attend? **YES**, if

- Your crops are underperforming.
- You struggle with pest and disease issues.
- Fertilizer costs are breaking your budget.
- You have water penetration problems.
- You want more income from your composting operation.
- You need to understand more about
- what compost is.
- You want to start a composting operation.
- You want to learn how composting
- can help you reach your goals.
- You want to **INCREASE PROFITS**
- **AND GROW YOUR BUSINESS.**

## How will this help you increase profits?

Our ACS Workshop brings fantastic value to farmers and growers of all kinds. In this three day training course, you'll get the hands-on experience and in-depth knowledge you need to make humus compost - the highest possible quality compost. If producing a higher grade compost isn't your goal, you'll still learn how produce compost at less cost, sell it at a higher prices, and deliver better value for customers.

You'll learn how to implement the Aeromaster Composting System, giving you the necessary tools to produce humus compost and transform your operation, increasing profits and building sustainable growth. You'll practice the composting methods you learn in the classroom on a real compost site, empowering you to repeat the process on your own soil.

The Aeromaster Composting System is centered on producing a higher quality compost that will give your soil the nutrients it needs to thrive. In the ACS Workshop, you'll learn from the experts who engineered and mastered this technology.

## Topics We'll Cover At The Workshop:

- The Basics of Making Compost
- Introduction to Aeromaster Composting System
- Benefits and value of producing and using Humus Compost
- Aeromaster Composting System process
- How to make the best end product from available materials
- Life of a compost windrow
- Composting logistics made easy
- Aeromaster Composting around the world
- Humus and soil microbiology
- Compost Tea study and the use of extracted Compost Tea
- Detailed comparison of Humus based vs. conventional agriculture
- A much deeper look into plants, soil parameters and the connection between the two!
- Learn how to Extract Humus Compost into Liquid Humus Extract
