

# Level II Soil Workshop

March 19-20, 2025  
Middlebury, Indiana

## Understanding Soils.

An advanced course on humus-based soil fertility.

### Who?

- Consultants or farmers who have attended at least one of our ACS composting or soil workshops in the past four years.
- Agronomists who have studied the Albrecht method of soil fertility.

### What?

- Effectively balancing the soil mineral profile.
- Providing adequate nutrition for plants and cropping systems of all kinds.
- Understanding and managing annual crops versus perennial crops.

### How?

- Interactive participation among the group.
- Working through your complex soil balancing and plant nutritional challenges.
- Brainstorming and learning from each other's successes and failures.

### Why?

- To provide agronomists and growers a resource for helping farmers to balance their soils, grow healthy crops, and experience long-lasting financial success.

- March 19: Full day
- March 20: Until 12 noon
- \$1,200 per person
- Location:  
Das Dutchman Essenhaus  
240 Highway 20  
Middlebury, IN 46540

Call: 815-438-7200
