ABOUT THE ACS WORKSHOP**

How will this help you increase profits?

The Basics of Making Compost

Introduction to ACS (Aeromaster Composting Systems)

Benefits of Composting

Microbiology and Water For Higher Quality Compost

Equipment Operating Tips for Efficiency & Compost Quality

Increasing Growers' Profits With Compost

Benefits of Compost Extract

Our ACS Workshop brings fantastic value to farmers and growers of all kinds. In this three day training course, you'll get the hands-on experience and in-depth knowledge you need to make high quality compost. You'll still learn how produce compost at less cost, sell it at a higher prices, and deliver better value for customers. You'll learn how to implement the Aeromaster Composting System, giving you the necessary tools to transform your operation, increasing profits and building sustainable growth. You'll practice the composting methods you learn in the classroom on a real compost site, empowering you to repeat the process on your own soil. The Aeromaster Composting System is centered on producing a higher quality compost that will give soil the nutrients it needs to thrive. In the ACS Workshop, you'll learn from the experts who engineered and mastered this technology.
